UpToDate integrated into our EHR clearly improves care and saves time — no question about it.

— DR. PAUL R. CLARK, MD FACP
CMIO CONCORD HOSPITAL, CONCORD, NH

More than 80 studies involving UpToDate have demonstrated an impact on learning, better clinical decisions, improved quality of care, patient safety, efficiency and mortality.

UpToDate is the only clinical decision support resource associated with improved outcomes.

Clinicians around the world recognize the impact of UpToDate in their daily practice.

UNITED KINGDOM
Pennine Acute Hospitals NHS Trust shows use of UpToDate improves patient care and hospital performance.2

More than 90% of respondents who had used UpToDate identified at least one benefit:

- 94% say UpToDate improves quality of care
- 85% report that it helps them find a clinical answer faster

SINGAPORE
Researchers at Singapore’s National University Hospital report that UpToDate significantly impacts clinical decision-making and practices.3

JAPAN
Kurashiki Central Hospital conducted a hospital-wide survey to evaluate the impact of UpToDate.4

"The data suggests the use of computerized tools such as UpToDate enables better decisions, better outcomes, and better care."
— Ashish Jha, MD, MPH, Harvard, and Study Author

Over a three year period, researchers at Harvard associated the use of UpToDate with

- Lower mortality rates
- Improved quality of every condition on the Hospital Quality Alliance Metrics
- Shorter lengths of stay

The data suggests the use of computerized tools such as UpToDate enables better decisions, better outcomes, and better care.

More than 80% of those who had used UpToDate identified at least one benefit:

- UpToDate increases patient satisfaction
- UpToDate saves time
- UpToDate increases staff satisfaction

Bringing UpToDate into the Clinical Workflow

- Users say having UpToDate embedded in their EHR:
  - 93% say it is important to patient care
  - 91% say it increases satisfaction with their EHR
  - 93% say it saves time
